

**Ecosystems are Complex**

- Organism → 1 living thing. ie: \_\_\_\_\_
- Population → all the members of that species ie: \_\_\_\_\_
- Community → All the living organisms (of different species) in an area.  
ie: \_\_\_\_\_
- Ecosystem → All the living organisms AND the non-living  
Non-living includes : \_\_\_\_\_

**Ecosystems Have Names**

Look at examples of Ecosystems on page 32. Copy down the 4 ecosystem names.

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

- Put a checkmark beside the ones we have in **Canada**. ✓
- Choose one of these ecosystems and copy down the characteristic biotic and abiotic features.

Ecosystem name	Abiotic features	Biotic features
