How to read an EnerGuide label for household appliances:

A - The energy consumption arrow just above the shaded bar scale shows how this model compares with the lowest-rated (to the left) and the highest-rated (to the right) model of the same type.

B - Annual energy consumption of the most energy-efficient model of the same type.

C - Type and capacity of the model.

D - The large number is the model's estimated annual energy consumption, in kWh.

E - Annual energy consumption of the least energy efficient model of the same type.

F - The appliance model number.
