Comparing Photosynthesis and Cellular Respiration

Use your knowledge of photosynthesis and cellular respiration to fill in the table.

You may need to conduct some research to complete the table *.

	Photosynthesis	Cellular Respiration
Organisms that perform the process		
Types of cells that perform the process *		
Starting materials		
Final products		
Use of final products by other organisms		
Energy required? Yes/no?		
Energy released? Yes/no?		
Energy source		
Importance to organisms that perform the process		
Importance to other organisms
